

MARCH 17, 2020

To our valued customers and members of public from the Westlock County Region. The Westlock Regional Landfill located outside of Westlock will not be receiving any recycle material until further notice. We ask that you store it for now as we know the virus does within 9 days when outside.

The transfer station and Landfill will be open, so we will continue to receive waste during regular hours. Staff will not be allowed to assist to unload or to handle any waste, so bring waste in a manageable volume for you to handle. If you have a cough or a fever please do not come out, if you do please be masked.

Staffs health and wellness are priority so among the above requirements, non-staff members will not be allowed into any buildings. The only exception is essential contractors as required.

Please follow any directions given to you by staff and be safe.

Thank You, Tom Moore, Commission Manager.
