

Serving our Residents since 1914.

Attention Village Residents

Looking for your help regarding the damage caused by flushing wet wipes and other products in the toilet.

Some products indicate that they are flushable, however the product will clog Village pumps and damage them. The cost is \$5000 or more to resolve the problem. Each of you risk potential sewage backup in your basements due to this practice.

Please do not put anything, other than toilet paper, in the toilet. Thank-you for your cooperation.
