## IS YOUR TOILET RUNNING UP YOUR WATER BILL?

Typically, toilets begin leaking when the toilet flapper or valve seal becomes old or worn out. A good way to check is to put some food coloring in the toilet tank and wait 15 minutes to see whether color shows up in the toilet bowl. If it does, you'll need to fix the flapper or valve seal. You can probably find the replacement part at your hardware store, but to be sure, take the old part with you for comparison.
