

Village of Clyde Fire Restriction

Message from Chief Hoetmer:

Effective 2:30 p.m. May 1, 2023, due to the dry hot weather and increasing fire hazard risk, the Village of Clyde has put a Fire Restriction in place.

1. Fires within the Village of Clyde are only allowed in fire pits that have been inspected and approved by the Village of Clyde Fire Department. Conditions outlined in the permit must be followed.
2. No new permits for fire pits will be issued at this time.
3. Use of fire pits for cooking & warming, propane BBQs, portable propane fireplaces & heaters is allowed.
4. Open burning outside of your fire pit is not allowed in the Village.

The Village of Clyde is asking that everyone use extreme caution during this dry & hot weather in our region.

Always know your location & dial 911 for any emergency

Additional Fire Safety:

Have a hose nearby!

Keep your hose turned on and nearby at all times when having a fire.

Windy weather!

Burning of any kind during windy days is NOT recommended.
This includes your fire pit.

Attend your fire!

Never leave your fire burning unattended.

Put it out!

Make sure your firepit fire is fully out before you leave it by spraying with your hose until it stops steaming.
